

Stem and Leaf plots

November 4th 2009

Stem and leaf plot: arrangement of 2 digit numbers where the tens digits are the stems and the ones digits are the leaves

Example: 54, 52, 58, 68, 72, 61, 74, 82

Start with the least number and record all stems and leaves in order from least to greatest

Can identify mean, median, and mode, as well as the range

stem	leaves
5	2 4 8
6	1 8
7	2 4
8	2
